Rear wash

Ladies wash

Enema wash B only

Air dryer

Heated seat

5 Level adjust

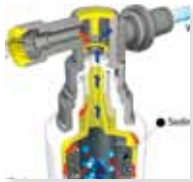

Massage & move

Air injection

Twin nozzles

MF Filter

Antimicrobial

Deodoriser B only

Remote

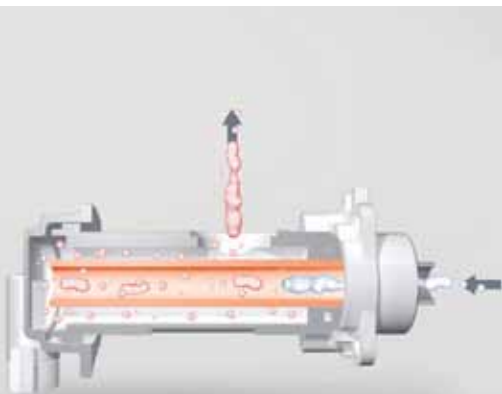

Easy to understand and operate. The holder mounts on the wall with adhesive tape. Just peel off and place where you want.

The remote is held in the holder by magnet. It simply pulls out of the holder and snaps back in when you are not using it.

Fully Encapsulated Stainless Steel Nozzles

Separate nozzles for bottom wash and ladies wash allows for accurate placement and delivery of the warm, adjustable, aerated wash at the push of a button.

Nozzles are adjustable to 5 different positions.

Instantaneous Heat

The instantaneous heating system uses the worlds most advanced technology. Providing 4 levels of warm water in only a few seconds.

Power use is approximately 20 washes for 1cent with an average annual water bill of less than \$10 p/year with four users.

Spray Functions (B model only, A model provides medium spray)

Spray width can be adjusted from narrow, medium and wide so you can cover the area you want. The pressure can also be adjusted to 3 different levels allowing for your preferred wash. Coway is the only brand that has this function.

Ergonomic lid & seat

The only retro fit bidet in the world designed so you can sit on the lid when closed.

Weight designed for all shapes and sizes, the Coway BA13 can easily support 150 kg.

Deodoriser

Sitting on the BA13B automatically initiates the inbuilt deodoriser.

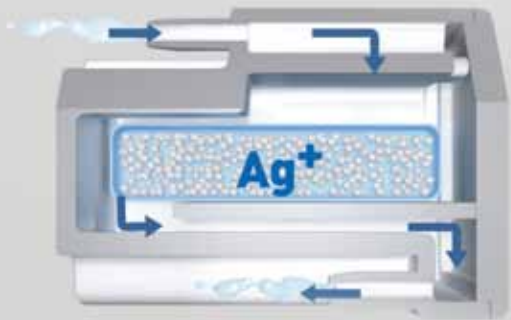

Bad odours are removed when the air is sucked from the bowl through a charcoal block neutralising any smells.

Silver Ion Generator

A silver ion generator is inbuilt in all BA13B models only.

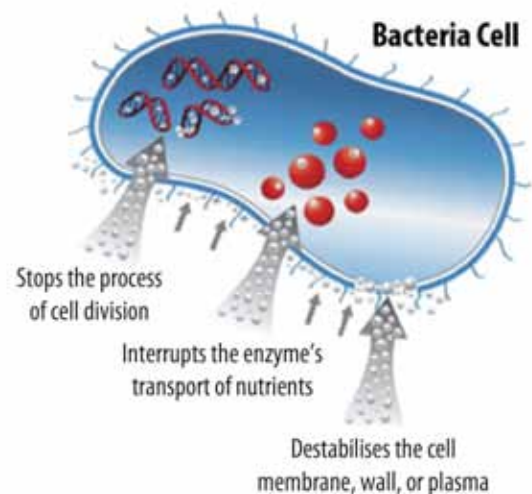

When you sit on the bidet the silver ion generator ionises the water passing over the nozzles.

This ensure an optimal level of protection against germs and viruses.

Antimicrobial Plastic

The external plastic components of the seat, lid and top case are treated with an antimicrobial coating to stop bacteria from living on your bidet.

Filter

The sediment filter removes particles from the water before entering the bidet. Protecting your internal heating systems.

Water then passes through the ceramic balls, containing silver ions that attack bacteria, germs and virus.
